Sate llite™

4000/4010/4020 Series

BATTERY PACK REMOVAL

- 1 Turn the computer upside down as shown
- 2 Slide the **battery latch** in the direction of the arrow to release it
- 3 Pull the **battery pack** slightly forward and lift out the battery pack

BATTERY REMOVAL

- 1 Push two tabs on **battery cover assembly**, outwards and remove the **battery pack** in the direction of the arrow

OPTIONAL PCMCIA CARD REMOVAL

- 1 Open the **PC card slot cover**
- 2 Slide the **PC card lock** to the unlock position
- 3 Pull out the **eject button** next to the PC card you want to remove and press the button to pop the PC card out slightly
- 4 Grasp the **PC card** and remove it

KEYBOARD REMOVAL

- 1 Open the display panel
- 2 Lift out the **Keyboard brace**

TOSHIBA

Tough Enough for Today's World.

4000/4010/4020 SeriesKEYBOARD REMOVAL

- 1 Rotate the **keyboard** out and lay it face down on the palm rest. Be careful not to apply pressure to the **keyboard cable**.
- 2 Disconnect the **keyboard cable** from **PJ10** on the system board and remove the **keyboard**.

HDD REMOVAL

- 1 Turn the computer upside down.
- 2 Remove one **M2.5x25 silver screw**.
- 3 Lift off the **HDD slot cover**.

EXPANSION MEMORY REMOVAL

- 1 Lift up the **insulator sheet** covering the **expansion memory**. Make sure the computer is in **boot mode**.
- 2 Gently press out the **latches** and the **expansion memory** will pop up.
- 3 Grasp the **expansion memory** and pull it out.

- 1 Grasp the **HDD bracket** and pull it forward to disconnect the **HDD**, then grasp the back end of the bracket and lift it out.
- 2 Remove four **flat-head screws** from the **HDD bracket** and lift out the **HDD**.

4000/4010/4020 Series

TOP COVER REMOVAL

- 1 Turn the computer upside down and remove **two M2.5x6 silver screws** from the battery slot, **one M2.5x6 silver screw** from the HDD slot, **five M2.5x25 silver screws** from the bottom cover and **two M2.5x6 silver screws** from the back of the computer.
- 2 Turn the computer right side up and open the display.

- 1 Remove **four M2.5x6 brass screws** securing the **top cover**.
- 2 Release **eight latches** securing the **top cover and display assembly**: **three latches** on the left side, **three latches** on the front and **two latches** on the right side.
- 3 Lift off the **top cover and display assembly** in the direction of the arrow.

- 1 Lift up the insulator covering four cables and disconnect them: **left speaker cable** from PJ21, **right speaker cable** from PJ22, **FL cable** from PJ4 and **LCD cable** from PJ3 (DSTN) or PJ23 (TFT) models.
- NOTE:** Keep tape covering Speaker/Inverter cables for assembly.

INSULATOR REMOVAL

- 1 Lift out the **insulator** over the positioning pin.
- NOTE:** Be sure to reinstall the insulator when assembling the unit. If the insulator is not installed the unit will not power ON.

TOSHIBA

Tough Enough for Today's World.

RTC and BACKUP BATTERY REMOVAL

- 1 Remove the tape securing a pad over the RTC and backup batteries
- 2 Disconnect the RTC battery cable from P.J7 on the system board
- 3 Disconnect the backup battery from P.J802 on the system board
- 4 Lift out the RTC and backup battery

FDD REMOVAL

- 1 Disconnect the FDD flexible cable from P.J14 on the system board
- 2 Remove one M2.5x6 brass screw securing the FDD and remove the FDD
- 3 Remove four flat head screws securing the FDD to the FDD case and separate the FDD from its case
- 4 Disconnect the FDD flexible cable from the FDD

LED BOARD and MEMBRANE SWITCH REMOVAL

- 1 Disconnect the LED board flexible cable from the LED board
- 2 Remove one M2.5x6 silver screw
- 3 Lift up the left side of the LED board to clear a latch on the right side to remove the board
- 4 Disconnect the membrane switch cable from P.J9 on the system board
- 5 Release one latch at the front edge of the membrane switch and lift out the membrane switch

NOTE: The FDD flexible cable and FDD bracket are all separate parts. Please DO NOT send the defective FDD with the flexible cable and bracket to TOSHIBA. The four screws, flexible cable and the FDD bracket should be kept to assemble the FDD you receive from TOSHIBA for the customer's unit.

TOSHIBA

Tough Enough for Today's World.

4000/4010/4020 Series

CD ROM DRIVE REMOVAL

1. Disconnect the CD-ROM flexible cable from P.J16 on the system board.
2. Remove two M2x6 brass screws securing the CD-ROM drive.
3. Slide out the CD-ROM drive in the direction of the arrow.

NOTE: The CD-ROM flexible cable and bracket are all separate parts. Please DO NOT send the defective CD-ROM flexible cable and bracket to TOSHIBA. The two screws, flexible cable and the CD-ROM bracket should be kept to assemble the CD-ROM you receive from TOSHIBA for the customer's unit.

CAUTION: When you lock P.J996 on the CD-ROM connector and P.J16 on the system board, push both sides of the connector lever at the same time. If you push the center of the lever, the cable can become disconnected easily or the connector broken.

SYSTEM BOARD REMOVAL

1. You will first remove the PC card slot cover. Pull out the PC card eject buttons and push them in. They do not bend them.
2. Insert tweezers between the top of the PC card slot cover and the bottom cover of the computer to release two latches.
3. Pull the top of the PC card slot cover forward to remove it. Two internal latches prevent the card from being pulled straight out, so rotate the top.

4. Disconnect the following five cables: RTC battery cable from P.J14, backup battery cable from P.J802, LED board flexible cable from P.J15, membrane switch cable from P.J17, and CD-ROM flexible cable from P.J12 on the system board.
5. Remove two M2.5x4 brass screws. One securing the system board directly and the other securing a small brace on the corner of the system board. Lift out the brace with the screw.
2. Remove two M2.5x6 brass screws securing the system board.
3. Lift up the left side of the system board about 5 cm and pull it out from the left side to avoid damaging the PC card eject buttons.

4000/4010/4020 Series

COOLING FAN REMOVAL

Cooling fan

M2.5x6 brass screws

- 1 Remove Tape covering PJB and the fan cable
- 2 Disconnect the fan cable from PJB on the system board
- 3 Remove **two M2.5x6 brass screws** securing the cooling fan
- 4 Lift out the **cooling fan** from the **system board**

NOTE: The cooling fan and system board are separate parts.
Please DO NOT send the fan to TOSHIBA with defective system boards. The fan and two screws should be kept to be attached to the system board you receive from TOSHIBA for the customers unit.

CPU BOARD REMOVAL

M2x14 brass screws

M2x4 brass screws

- 1 Remove **three M2x14 brass screws** and **two M2x4 brass screws** securing the processor module to the system board in the following order: 5-4, 3-2-1
- 2 Lift out the heat sink

REMOVING THE SPEAKERS

M2.5x6 brass screws

Left and Right Speaker brace

- 1 Remove one **M2.5x6 brass screw** securing each **speaker brace**
- 2 Remove each brace and lift out the speakers

Processor module

System board

- 3 Grasp the **processor module** evenly on both sides and pull the module carefully to disconnect it from PJB1 on the **system board**
